

Colorado

*A Housing market analysis*

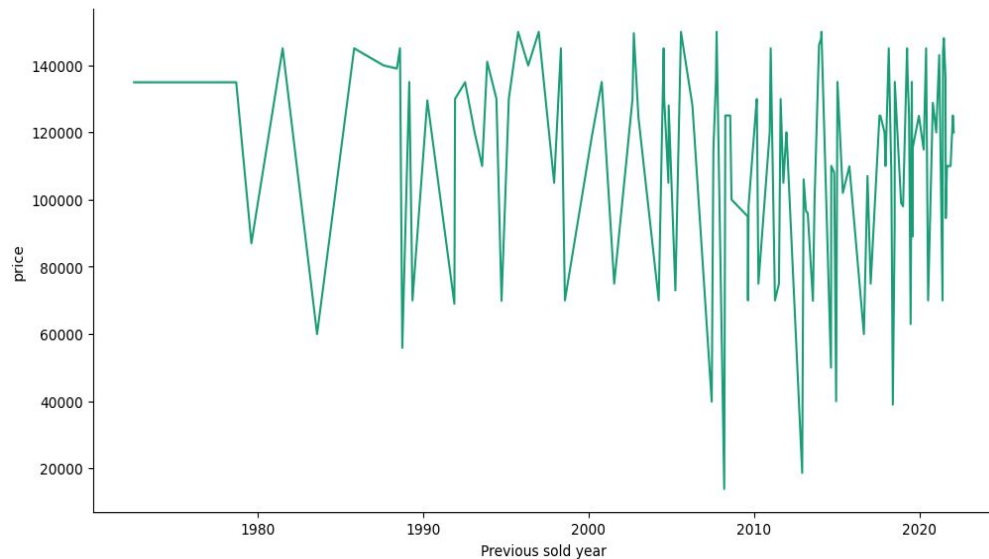

Primary question :

What factor affects the cost of a house the most?

# Time factor?

## Original chart #1

While this chart does, answer the question of price it does not help me determine which factor weights in the most on price.

# Bed factor

While analysing how the amount of beds affect the price of houses in colorado, the main thing I noticed is that while the amount of rooms does help show the minimum it does not help show the maximum cost.
